Sample Response Codes 8

Introduction

Speed Remit has developed an online Application Programming Interface (API) for partners that would payout transactions (Payout Partners) initiated in Speed Remit's send network. This API interface interacts with the Speed Remit Agent Internet System in real time. This document will describe what the interface is designed to do and how it can be used. It also contains technical information to provide a general working direction for the Payout Partner.

The Payout API is designed for Payout Partners that are able to exchange information via web services, and require real-time communication.

Scope of payout API

This document covers the generic online interface developed by Speed Remit to allow money transfer transactions to be paid out by Payout Partners using their own systems rather than Speed Remit's Agent Internet System as a front end.

API Methods

1. ShowTransfer

This method will be used by the Payout Partner to request the details of a specific transaction which they wish to pay out. The Payout Partner will provide a Speed Remit transaction reference number, or other partner-specific payout number, and the system will validate the request against the business rules for a payout. If valid, the full transaction details will be returned.

2. PayoutTransfer

This message will allow the Payout Partner to send an update for a Speed Remit cash transaction, for which they have previously obtained the details using the Show Transfer. Reasons for update would include:

• Payout - This will be validated against the business rules for paying transactions. It is the equivalent of the Payout screen.

3. ChangePassword

This message will allow the Payout Partner to change user's password and return the response code.

4. ListTransfers

This method will be used by the Payout partner to list all UnPaid transactions to a particular account.

- ***ShowTransfer*** → **Request from Partner to Speed Remit**

Field Name	Size	Type	Description	O/M

PartnerCode	10	Numeric	Unique number identifying the partner interface.	M
UserName	30	String	User name assigned to this partner.	M
UserPassword	30	String	Password of the user name assigned to this partner.	M
TransactionNumber	20	String	Unique number identifying the Transaction.	M

- ***ShowTransfer*** ← **Response from Speed Remit to Partner**

Field Name	Size	Type	Description	O/M
ResponseCode	3	Numeric	Contains code explaining outcome of message request.	M
Message	255	String	Text to elaborate on the response code.	M
TransactionNumber	20	String	Unique number identifying the Transaction.	M
Status	20	String	Description of the transaction status.	M
TransactionDate		DateTime	Date transaction was created in UTC format.	M
PayOutCountry	3	String	Code identifying the receiving country.	O
PayOutCurrency	3	String	Code identifying the currency of the receiving country.	M
PayOutAmount		Numeric	Amount of money to be paid to the receiver (in payout currency).	M
PayOutBranchCode	10	String	Unique branch code of payout partner.	M
PayOutAmountInUSD		Numeric	Amount of money to be paid to the receiver (in USD currency).	M
PayOutCommissionAmount		Numeric	Commission share of payout partner (in payout currency).	M
SenderFirstName	30	String	First name of customer.	M
SenderLastName	30	String	Last name of customer.	M
SenderAddress	255	String	Complete address of customer.	O
SenderCity	100	String	City of customer address.	O
SenderNationality	3	String	Country of customer addresses (ISO code).	O
SenderPhoneNumber	30	String	Phone number of customer.	O
ReceiverFirstName	30	String	First name of receiving customer.	M
ReceiverLastName	30	String	Last name of receiving customer.	M
ReceiverAddress	255	String	Complete address of receiving customer.	O
ReceiverCity	100	String	City of receiving customer address.	O
ReceiverNationality	3	String	Country of receiving customer addresses (ISO code).	O
ReceiverPhoneNumber	30	String	Phone number of receiving customer.	O

- ***PayoutTransfer*** → **Request from Partner to Speed Remit**

Field Name	Size	Type	Description	O/M
PartnerCode	10	Numeric	Unique number identifying the partner interface.	M
UserName	30	String	User name assigned to this partner.	M
UserPassword	30	String	Password of the user name assigned to this partner.	M
TransactionNumber	20	String	Unique number identifying the Transaction.	M
ReceiverIDType	20	String	Id type of the primary id shown by the recipient For Example:- Passport, National ID, Driver's License etc	O
ReceiverIDNumber	20	String	The number or identifier of the primary id shown by the receiver.	O

- ***PayoutTransfer*** ← **Response from Speed Remit to Partner**

Field Name	Size	Type	Description	O/M
ResponseCode	4	Numeric	Contains code explaining outcome of message request	M
Message	255	String	Text to elaborate on the response code	M
TransactionNumber	13	String	Unique number identifying the Transaction	M
Status	20	String	Status of transaction number.	M
PayOutDate		DateTime	Date transaction was paid in UTC format	M
PayOutCountry	3	String	Code identifying the receiving country	O
PayOutCurrency	3	String	Code identifying the currency of the receiving country	M
PayOutAmount		Numeric	Amount of money to be paid to the receiver (in payout currency)	M
OtherInformation	50	String	Provides additional information like Card No, CNIC etc	O
PayOutBranchCode	10	String	Unique branch code of payout partner.	M
PayOutAmountInUSD		Numeric	Amount of money to be paid to the receiver (in USD currency).	M
PayOutCommissionAmount		Numeric	Commission share of payout partner (in payout currency).	M

- ***ChangePassword*** → **Request from Partner to Speed Remit**

Field Name	Size	Type	Description	O/M
PartnerCode	10	Numeric	Unique number identifying the partner interface.	M

UserName	30	String	User name assigned to this partner.	M
UserPassword	30	String	Password of the user name assigned to this partner.	M
NewPassword	30	String	New password to assign to the user name.	M

- ***ChangePassword*** ← **Response from Speed Remit to Partner**

Field Name	Size	Type	Description	O/M
ResponseCode	4	Numeric	Contains code explaining outcome of message request	M
Message	255	String	Text to elaborate on the response code	M

- ***ListTransfers*** → **Request from Partner to Speed Remit**

Field Name	Size	Type	Description	O/M
PartnerCode	10	Numeric	Unique number identifying the partner interface.	M
UserName	30	String	User name assigned to this partner.	M
Password	30	String	Password of the user name assigned to this partner.	M

- ***ListTransfers*** ← **Response from Speed Remit to Partner**

Field Name	Size	Type	Description	O/M
TransactionNumber	20	String	Unique number identifying the Transaction.	M
Status	20	String	Description of the transaction status.	M
TransactionDate		DateTime	Date transaction was created in UTC format.	M
PayOutCountry	3	String	Code identifying the receiving country.	O
PayOutCurrency	3	String	Code identifying the currency of the receiving country.	M
PayOutAmount		Numeric	Amount of money to be paid to the receiver (in payout currency).	M
SenderFirstName	30	String	First name of customer.	M
SenderLastName	30	String	Last name of customer.	M
SenderAddress	255	String	Complete address of customer.	O
SenderCity	100	String	City of customer address.	O
SenderNationality	3	String	Country of customer addresses (ISO code).	O
SenderPhoneNumber	30	String	Phone number of customer.	O
ReceiverFirstName	30	String	First name of receiving customer.	M
ReceiverLastName	30	String	Last name of receiving customer.	M
ReceiverAddress	255	String	Complete address of receiving customer.	O

ReceiverCity	100	String	City of receiving customer address.	O
ReceiverNationality	3	String	Country of receiving customer addresses (ISO code).	O
ReceiverPhoneNumber	30	String	Phone number of receiving customer.	O

Note: ***O - Optional, M - Mandatory***

Transaction Status Codes

Code	Description
UnPaid	When the transaction has been sent and is ready for payout.
ComplianceBlock	If the transaction has been stopped by Compliance check.
Paid	When the transaction has been paid to the customer.
Cancelled	Transaction already cancelled
Processed	Transaction has been processed. Ready for payout.

Sample Response Codes

Code	Description
101	Query Successful
102	Transaction not found.
103	Mandatory data missing
104	Payment already made
105	Transaction already cancelled
201	Invalid Partner Code
202	Invalid User Name or Password
301	A system error has occurred in the processing of your request.
302	Unable to process – please Contact
